PROGRAM STUDI TEKNIK INFORMATIKA
SEKOLAH TEKNIK ELEKTRO DAN INFORMATIKA
INSTITUT TEKNOLOGI BANDUNG
BANDUNG
2021

1 Algoritma *Decrease and Conquer*

Proses *decrease and conquer* untuk topological sort dilakukan dengan *decrease by variable size*. Langkah-langkah algoritma *decrease and conquer*-nya adalah sebagai berikut:

1. Lakukan partisi pada graf, misal $G_1 = (V_1, E_1)$, dengan pertama-tama mencari sudut-sudut di graf yang memiliki derajat masuk 0 atau $d_{in}(V_i) = 0$.
2. Partisikan G_1 menjadi sebuah senarai dan graf baru, misal graf $G'_1 = (V'_1, E'_1)$. Senarai berisi sudut dari graf yang memiliki derajat masuk 0, sedangkan graf baru berisi sudut-sudut pada graf awal dikurangi sudut yang memiliki derajat masuk 0.
3. Lakukan kembali langkah-langkah sebelumnya untuk G'_1 sampai dengan $|V'_1| = 0$.
4. Masukkan senarai-senarai dari langkah 1–3 ke sebuah senarai dari senarai dari simpul secara berurutan dari iterasi pertama.
5. Senarai baru adalah hasil *topological sort* yang sudah diurutkan.

3.9 Tabel Penilaian

Poin	Ya	Tidak
1. Program berhasil dikompilasi	✓	
2. Program berhasil <i>running</i>	✓	
3. Program dapat menerima berkas input dan menuliskan output	✓	
4. Luaran sudah benar untuk semua kasus input	✓
